

# Chemical Production Facilities

We've been a leader in the electrical industry for over 60 years because we understand that an industrial facility's electrical needs are crucial to effective operations.

We provide an extensive range of regularly scheduled and emergency maintenance and repair services.

Whether your electrical needs are part of a process or controls implementation, a planned outage, upgrade or other emergency/unanticipated issue, our experienced team delivers quality workmanship while adhering to strict safety standards, timelines and budgets.

## Why Schuler-Haas?

Electrical solutions within the chemical processing and production industry are highly specific. It demands special requirements and installation methods with large volumes of volatile material.

By collaborating closely with Schuler-Haas, your facilities can optimize their operations, enhance safety measures, and contribute to sustainable and efficient manufacturing processes.
